

Protexol's Thirty~4[©] Program

Developing Integrated Custom, aligned Business Processes and Management, System.

It took the Protexol team, with marketplace recognized leadership, thirty years to develop and fine tune the four elements of our new, fully integrated and aligned Business Process and Management System. Hence the Thirty~4 program name.

The sole purpose of Protexol's Thirty~4 Program is to provide our clients the ability to exceed expectations for exponential growth, today and into the future.

This unified four-element approach operates much like a Rubik's Cube. The Cube is only solved when all six sides are properly aligned; top to bottom, front to back, side to side. Only then can the enterprise operate in perfect unison and operate unaffected by its current or unexpected circumstance.

- Element ONE: Continuous Operational Process Synergy (COPS[©]) – Enterprise-wide Process Alignment
- Element TWO: Smart Risk Technology (SRT[©]) – Enterprise-wide Proactive Risk Analysis and Mitigation for Risk Alignment
- Element THREE: Secure Unified PUSH Communication (EYRIS[©]) – Enterprise-wide routine business through prescribed Emergency Communications Alignment
- Element FOUR: Knows It All Technology (KiAT[©]) pronounced “cat” Enterprise-wide Early Warning Alignment Reacts to potential failure identification in milliseconds with appropriate warnings to ACT

Protexol's Thirty~4 Program: Exceeding Expectations
Through Enterprise-Wide Risk Based Thinking.
